UNLOCKING POTENTIAL POWERING DEVELOPMENT

Copperbelt Energy Corporation Plc (CEC) is a Zambian power generation, transmission, distribution and supply company, operating in the Copperbelt Province of Zambia and the Katanga region of the Democratic Republic of Congo (DRC). CEC is a major supplier of power to the mining industry in the region. CEC operates in the DRC market through its subsidiary, CEC-DRC Sarl. The privately-owned power utility is a member of the Southern African Power Pool, a pioneering international power trader in Southern Africa and publicly traded on the Lusaka Securities Exchange with more than 7,000 investors.

The asset-rich business, owning and operating multimillion-dollar power infrastructure, has a network comprising over 1,000 kilometres of 220kV, 66kV and 11kV transmission lines, 48 high voltage substations and a transmission interconnector with the DRC. CEC's current power generating assets comprise 80MW thermal and 94MW grid-connected solar PV plant. Several renewable solar, wind and hydroelectric generation prospects are in development.

CEC is your reliable partner in energy – unlocking potential, powering development.

Welcome to

**Kitwe Showgrounds,
Copperbelt, Zambia
28—30 May 2024**

The Directors of the Copperbelt Agricultural and Commercial Show Society (CACSS), the Management, and indeed on my own behalf, I would like to welcome all the Exhibitors, our Partners, and the Visitors to the 68th Annual Show which is being held under the brand name Copperbelt Agricultural, Mining, Industrial and Networking Expo CAMINEX 2024 under the Theme **“Unlocking Opportunities for Growth: Zambia’s Land Linked Position”**.

This year’s theme not only speaks to the Government, but the Business community as well. We are all challenged to address the issues hindering growth by exploring untapped opportunities such as improving mining and mining value chain opportunities, spurring economic diversification through private sector development in key sectors such as agriculture, green economy, science and Technology, circular economy etc. We are encouraged to explore business linkages and partnerships whilst looking to the region for export of our various goods and services.

As CACSS we looked at the Show that was held last year as successful despite the anxieties of not having held the Show for 3 years due to the Covid 19 Pandemic. We attribute this huge success to the response that you collectively gave, by coming on board to support the Show Society. Together, we were able to rise above the challenges that we had due to the shutdown in the years before due to the COVID 19 Pandemic.

This year, we are excited that once again, we are able, to come together to show case the products and services that are available and to share knowledge and information through the Seminars that are held on the sidelines of CAMINEX 2024.

The Government has for the last two years been working tirelessly to unlock investments in the mining industry. We are excited to see that great strides have been made in finding equity partners in this sector and we are confident that this will spur growth in this industry and the Country as a whole.

You may have noticed that over the last few years, the Show Society has worked tirelessly to turn around the Show by removing the funfair component of the show and increasing the business portfolio of the Expo. This rebranding has been done to make the show to become the preferred business

knowledge exchange platform for all sectors of our economy.

Allow me to thank the following Ministries: Mines and Mineral Development; Commerce, Trade, and Industry; Agriculture; Fisheries and Livestock; Technology and Science; Green Economy and Environment; and Infrastructure, Housing and Urban Development.

Further gratitude goes to the Zambia Chamber of Mines and Kitwe District Chamber of Commerce and Industries for their endorsement and the support that they provide to the Show Society.

I would also like to thank all our valuable sponsors who have made it possible for us to hold and build on the CAMINEX Brand as well as all our partners who have provided and continue to provide material support in the preparations and running of this Expo.

Allow me to also recognize our exhibitors who have worked extremely hard on their stands in order to ensure a good and excellent presentation of the goods and services. We urge you to seek continuous improvement in this area so that together, we can work towards hosting world-class exhibitions right here in the heart of the Copperbelt.

Finally, and last, but not least, to our valued Visitors. The entire show is being put together by the Exhibitors so that you are well informed and benefit from what has been put on display as well as from the technical seminars that run on the sidelines of the show.

We look forward to welcoming you back here next year.

Thank you and I welcome you all to CAMINEX 2024.

**THE COPPERBELT AGRICULTURE
& COMMERCIAL SHOW SOCIETY**

Hon. Paul Chanda Kabuswe

On behalf of the Ministry of Mines and Minerals Development, I wish to extend my heartfelt gratitude to the Copperbelt Agricultural, Mining, Industrial and Networking Expo (CAMINEX) for yet again hosting the 2024 Expo.

The Expo presents an opportunity for key stakeholders in the mining, agricultural and industrial sectors to showcase a diverse array of efforts they are making aimed at contributing to the country's socio-economic development.

Zambia being a land-linked country presents various opportunities in trade, mining and agriculture, as such an event as the CAMINEX provides an opportunity for various industry players to engage and develop with innovative ways of accelerating Zambia's economic transformation.

This includes the need for diversification of the economy to ensure it meets the developmental aspirations espoused under the Eighth-National Development Plan (8NDP).

The mining sector in Zambia has witnessed positive developments since the New Dawn Administration took over Government presenting various opportunities. They include high demand for critical minerals which are key to energy transition as the world seeks cleaner sources of energy.

It is for this reason, that Government through the Ministry of Mines and Minerals Development is undertaking various reforms in the sector aimed at ramping up production, particularly in the quest to attain the Three Million Metric Tonnes of copper by 2031.

The 2024 CAMINEX under theme: “**Unlocking Opportunities for Growth: Zambia Land-Linked Position**” resonates well with the Government's aspiration of making the country a significant player in the global supply chain of critical minerals, through increasing copper production to three million tonnes per annum by 2031.

Above all, in order to meet the ambitious targets, Government has created a conducive environment for the mining sector to thrive, and this includes, putting in place a mining tax regime that provides a win-win situation for Government and investors.

This is evident through the Mineral Royalty Tax which is treated as an expense for tax computation purposes as while as the formulation of a favorable tax regime for investments.

I wish to warmly welcome you all to the 2024 of the Copperbelt Agriculture, Mining Industry and Expo (CAMINEX)

Hon. Chipoka Mulenga, MP

Dear exhibitors, partners and visitors!

On behalf of the Ministry of Commerce, Trade and Industry, I would like to warmly welcome you all to the 2024 Copperbelt Mining, Agricultural and Industrial Trade Expo which is being held under the theme “**UNLOCKING OPPORTUNITIES FOR GROWTH: ZAMBIA’S LAND LINKED POSITION**”.

A special word of thanks and recognition to the Copperbelt Agricultural and Commercial Show Society Board and Management for their relentless spirit and drive in organising such an essential forum that plays a key role in the growth of the country’s mining, agriculture and industrial sectors.

This year’s Expo focus is timely as it corresponds with Governments commitment to ensuring Zambian businesses are able to benefit from the country’s strategic position in the region. Zambia’s strategic location as a land-linked nation can be used to its full potential as it presents us with unique advantages and opportunities. Our geographic location positions us as a gateway to regional trade and international markets, offering immense potential for trade and investment opportunities.

I am happy to statement that Government continues to support the strengthen of local production by encouraging local sourcing, partnerships and growth of local value chains. By building local capacities, we can harness the various available opportunities that our businesses can leverage on for growth and expansion beyond our borders. The Government has also continued to support integration of our local businesses into regional and international markets by facilitating access to markets.

Through facilitation of trade fairs and exhibitions such as this, my Ministry has also continued to foster the creation of market linkages and greater integration of Zambian businesses in international trade.

I therefore wish to urge the businesses participating in the 2024 Copperbelt Mining, Agricultural and Industrial Trade Expo to leverage on this platform by effectively networking with participants from across the country and market their goods and services to participants from across the region.

I am hopeful that this year’s Expo will once again, provide a platform for fostering greater collaboration between governments, private sector entities, investors and development partners so that we can all work together to unlock Zambia’s full economic potential.

I am also looking forward to seeing new partnerships for trade and investments formed, among local businesses and with participants from neighboring countries and beyond. I am also hopeful that these linkages will bear fruits beyond this event.

I WISH YOU ALL A MEMORABLE EXPO AND FRUITFUL BUSINESS CONTACTS.

Hon. Reuben Mutolo Phiri, MP

On behalf of the Ministry of Agriculture I warmly welcome you all to the 2024 Copperbelt Agricultural, Mining, Industrial and Networking Expo (CAMINEX) which is being held under the theme **“Unlocking Opportunities for Growth: Zambia’s Landlinked Position”**.

You are all aware that the El Nino weather phenomenon experienced in the last farming season has had an adverse effect on agricultural production and threatens the national food security with more than one million households affected.

You may also wish to know that 84 out of 116 districts in the country were affected, with one million hectares of the crop planted damaged. The New Dawn Government is committed to putting up measures to counter the effects of the drought situation we have encountered not just in Zambia but many parts of Southern Africa.

The President of the Republic of Zambia, His Excellency President Hakainde Hichilema in the month of February 2024 declared the drought crisis a national disaster and called for concerted efforts in addressing the challenge, which includes realigning the 2024 national budget so that national resources are channelled towards addressing the impact of the drought.

Following that declaration, the Ministry of Agriculture through the Food Reserve Agency (FRA) has commenced the emergency procurement of non-genetically modified maize at elevated prices. This is in pursuant to section 22 (1): (2) (a) and (c) of the Food Reserve Act No. 6 of 2020. This is in an effort to ensure that we replenish the national strategic food reserves to ensure a sustainable national food security.

The New Dawn government also in a bid to address the

adverse impact of the drought has through the Citizens Economic Empowerment Commission (CEEC) put up a call for applications for small sized milling plants, agricultural mechanisation, and irrigation system support and energy loans.

Government has also launched a comprehensive campaign named the “Mechanised 360 Ulimi Okwana” programme aimed at mechanising 500,000 hectares of smallholder farmers’ land by 2027 to enhance food and nutrition security across the nation.

This programme will see mechanisation centres of excellence established in each province and in all districts. The established centres of excellence will be responsible to train farmers, extension workers and stakeholders on the appropriate use of mechanisation throughout the country.

In addition, government has expanded the newly introduced Sustainable Agriculture Financing Facility/ Credit Window (SAFF) to support access to financing for agricultural mechanization equipment, livestock and fisheries.

It is envisioned that the country will attain a sustainable national food security with the implementation of the above measures.

I am therefore, glad that, this year’s show has attracted a good number of exhibitors especially from the agriculture sector, which has been the tradition of this event for the over 60 years of its existence.

Finally, I wish to commend the show organising committee for putting up a wonderful show this year and I wish you a spectacular show.

Hon. Makozo Chikote, MP

On behalf of the Ministry of Fisheries and Livestock and indeed on my own behalf, I welcome you to this year's Copperbelt Agricultural, Mining, Industrial, Networking and Enterprise Exhibition (CAMINEX). I wish to thank the organisers of this event who have been working round the clock to ensure that this year's exhibition takes place. As you may be aware, this year's theme is **"Unlocking Opportunities for Growth; Zambia's Land Linked Position"**.

Unlocking Opportunities in this sector will therefore, be pivotal to the diversification of the economy as it will not only provide household income through direct revenue for farmers but also enhance national income through exports. In order to achieve this, we can not run away from the challenges that the farmer is facing to achieve the intended goals; these challenges have been in the past year, unique in nature.

The 2023/2024 farming season has been characterised by a drought due to the El Niño which has also affected the fisheries and livestock sector. The direct effects of the drought have been the spread of diseases such as foot and mouth, anthrax due to high temperatures, loss of aquatic terrestrial life, reduced surface water levels and poor pastures for livestock. Indirect effects have been social and economic such as depressed pricing to get rid of stock before further losses, loss in business for input suppliers, loss of employment and reduced protein source at household level.

While all hope is not lost, my Ministry has embarked on a number of programmes to seize opportunities that still exist to thrive and contribute to increased Livestock production and productivity. Currently the cattle population stands at 4,698,972 and is targeted

to reach 7 million. The following interventions have been placed by my ministry;

- 1) Improved access to market information systems and establishment of Fisheries and Livestock market centres such as the Mukambo boarder in Mufulira.
- 2) Improved access to finance for production, light-Agro processing and exports.
- 3) Facilitation of domestic and international trade.
- 4) Conducting of Genetic Improvement Program (GIP) for local fish species in order to improve growth and survival.
- 5) Over-sowing of existing rangelands with drought tolerant species.
- 6) Salvaging of wasted maize fields to make silage for supplementary feeding.
- 7) Operationalisation of Artificial Insemination satellites and Multiplication centres to maintain desired livestock traits and genetics for improved herds.
- 8) Disease prevention, control and enhanced surveillance through logistical support to field services.
- 9) Equipping of provincial Laboratories for diagnosis to reduce burden on the National lab.

In conclusion, the Copperbelt Agricultural, Mining, Industrial, Networking and Enterprise Exhibition (CAMINEX) serves as a vital platform for addressing and overcoming the challenges faced by the agricultural sector in Zambia. Despite the recent adversities such as the drought caused by El Niño and its detrimental effects on the fisheries and livestock sectors, the Ministry of Fisheries and Livestock remains steadfast in its commitment to fostering growth and sustainability.

BARRICK

LUMWANA

Barrick's Embedded Growth Projects to Drive Value With 30% Rise in Production With the potential embedded in its growth project portfolio, Barrick Gold Corporation plans to double its copper production by the end of the decade and continue to increase it to an estimated 1 billion pounds or 450,000 tonnes of copper per annum by 2031.

President and chief executive Mark Bristow said this substantial growth in copper production combined with the output from Barrick's sector-leading gold portfolio was expected to increase the group's attributable production by some 30% to ~7 million gold-equivalent ounces by 2030.

Reko Diq in Pakistan is positioned to rank as one of the world's top 10 copper mines when it reaches full production and the pre-feasibility study on the Lumwana Super Pit Expansion is projected to deliver a potential of 240,000 tonnes of copper production per annum from a 50 million tonne process plant expansion over a 36-year life of mine.

The accelerated Lumwana work program is now targeting to complete a full feasibility study by the end of 2024, which brings forward Barrick's expected production from the Super Pit to 2028. The Reko Diq project also remains on track to deliver an updated feasibility study by the end of 2024. Together, the Reko Diq and Lumwana Super Pit feasibility studies will underpin potential reserve updates and the transition to construction.

Since 2019, Lumwana has contributed almost \$3 billion to the Zambian economy in the form of royalties, taxes, salaries and the procurement of goods and services from local businesses. Local procurement of \$472 million in 2023 made up more

than 81% of total spend for Lumwana. Barrick has also launched a Business Accelerator Program designed to build the business capacity of the Zambian contractors in its supply chain, equipping them to grow and diversify their enterprises and remain sustainable beyond Lumwana's life of mine.

"In line with Barrick's partnership philosophy, our REDD+ initiative will uplift our host communities through conservation of the natural forest surrounding the mine. Resources have already been allocated and engagement with the communities is underway. We are in discussion with the Ministry of Green Economy and Environment to facilitate the required licensing and our partnership with local government," Bristow said.

Barrick is a sector-leading gold and copper producer with mines and projects in 18 countries across four continents. Its shares trade on the New York Stock Exchange (symbol GOLD) and the Toronto Stock Exchange (symbol ABX). Its portfolio is focused on high-margin, long-life gold and copper assets.

Barrick is the biggest gold miner in Africa and operates six of the top Tier One gold mines in the world, including Nevada Gold Mines, the largest gold mining complex in the world.

It has one of the longest project pipelines in the gold industry, with growth projects set to deliver an industry-beating production profile. Brownfields projects near existing operations, greenfield exploration discoveries and some of the largest undeveloped gold and copper deposits in the world provide significant optionality and leverage to gold and copper prices.

DRIVING VALUE, **BUILDING GROWTH**

Barrick consistently delivers sector-leading returns to its shareholders while the benefits it generates for all stakeholders drives economic development and social upliftment in its host countries. Its ability to sustain the profitability which enables this is secured by the world-class growth projects embedded in its asset portfolio. Organic growth alone is expected to increase its attributable gold and copper production by some 30% by the end of this decade, a likely peerless achievement.

BARRICK

World-class mines. World-class people.

The expansion of Lumwana in Zambia, part of Barrick's growing copper portfolio, will extend its life to 36 years and almost double its annual production.

NYSE : GOLD • TSX : ABX

ZCCM-Investment Holdings has partnered with United Arab Emirates (UAE) firm, International Resources Holding (IRH) to unlock Mopani Copper Mines PLC. The unlocking of Mopani Copper Mines PLC will translate into among others:

- Completion of Expansion Projects (Mindola Deeps Shaft, Henderson Shaft, Synclinorium Shaft, Tailings Storage Project, etc.)
- More business for local contractors and suppliers
- Employment of more workers (direct MCM employees and contractors)
- More meaningful Corporate Social Responsibility (CSR) projects
- Continuous contribution to the economic growth through taxes, rates, etc.

MAKING MOPANI GREAT AGAIN!

Lusaka Telecom Solutions Group was founded in Zambia by dynamic telecom technopreneurs in 2015 as Lusaka Telecom with focus on four major business lines specifically Fibre optic solutions, Technology Infrastructure, Tower

Construction and Power Solution. The founders have been in the telecom industry for many years coming together with the aim to close up the gaps between telecom users' expectation and providers capability to deliver. We aim to be the telecom provider of choice through building long term partnerships and alliances, hence becoming one of the top telecom players in Africa and Middle East.

Our mission is to provide world class fibre optic service with end-to-end solutions for the complete life cycle of turnkey, as well as ensuring that our clients receive an outstanding service in all the solutions that Lusaka Telecom provides at optimum cost and high quality. Our services start from design through to trenching, ducting, fibre blowing slicing, installation, commissioning and maintenance. Point to point FTTx, GPON and EPON connections. Leasing of dark fibre can be negotiated on behalf of clients where available.

Smart INVOICE

Invoice the Smart Way

What is Smart Invoice?

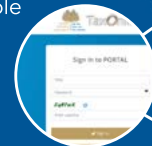

Smart Invoice is an electronic invoicing system that will be used by ZRA to manage all invoices and stock data which will be transmitted to ZRA by taxpayers.

The Smart Invoice caters for different categories of taxpayers as follows:

The Mobile App - It is suitable for taxpayers such as those on Turnover Tax and Rental Tax. Taxpayers will install the mobile application on a smartphone or tablet to create and manage transactions. Taxpayers are not restricted to using the mobile application as the only invoicing solution. They can choose to use any of the other available invoicing packages.

Online invoicing - Online invoicing platform is accessed through a web browser or an online portal and suitable for taxpayers in the service industry who do not issue invoices frequently e.g. construction and lawyers.

Desktop Application – This invoicing package is suitable for all taxpayers except those with accounting packages.

Smart Invoice offers several benefits including:

- ▶ **cost savings,**
- ▶ **reduced tax evasion**
- ▶ **faster invoice processing,**
- ▶ **reliability of invoice information,**
- ▶ **improved compliance,**
- ▶ **reduced accounting errors,**
- ▶ **improved accuracy of financial data,**
- ▶ **ability to pre-fill tax returns, stock management and environmental sustainability.**

All taxpayers registered for **eligible** types of taxes will be required to use the Smart Invoice to record transactions.

CONTACT US:

For all Smart Invoice relation questions,
email SIPROJECT@zra.org.zm or give us a call on **4111**

Synergy Seeds is a Zambian owned company, and we are leaders in seed breeding, production and marketing of robust Maize hybrids, soya beans and wheat seed.

Our block buster Maize hybrids are suitable for all the three agro ecological regions of Zambia. Our Maize hybrids in the medium maturity range include SY 6250, SY 6444 and MRI 624. Our Maize hybrids in the early maturity range include SY 5944, SY 5054, MRI 514 and SY 4052 which perform extremely well in low rainfall areas. On the legumes we have Dina soya beans, a 4.5MTs per Ha high yielding variety with excellent tolerance to shattering and acidic soils, high protein, and oil content. Our wheat varieties average 9MTs per Ha with good baking quality and tolerant to diseases. We distribute our seeds through a channel of 300 SMEs known as agro dealers/stockists across the country. Farmers can access our products anywhere in the country at the recommended retail price. In bridging the knowledge gap, our sales and marketing team dotted across the country train farmers on good agronomic practices, to enable farmers attain the much-desired yields. As Synergy, we are also involved in a number of Corporate Social Responsibility activities. Synergy "keeping You On Top Of The Yield Curve" A Good Farmer Knows... The Seed That Yields!

In a vision to create an impact in the foam industry, an entrepreneurial mission to imprint a footprint of foam industry began. With a vision of Mr. Dhuru.G. Patel, founder of perfect products. URest Foam Ltd was launched in the year 2001.

Our foam since inception has been manufactured with the latest Technological Machinery. The objective was to produce foam on limited scale before penetrating the broader foam market in the country. Over the years this company has grown from a small plant to a fully automated foam manufacturing unit.

From uncovered foam sheet and cushions, it grew to produce foam mattress, pillows, spring mattress and also beds. We have not limited ourselves to Copperbelt, but are expanded throughout Zambia to provide the people with affordable quality products.
